WORK EXPERIENCE

Risk Data Scientist – OnDeck

July 2015-Present

- Developed loss forecasting and time-to-default models based on payment and behavioral customer data.
- Trained fraud model (saving ~750k dollars per quarter) and developed unit tested model code running in production with real-time data validation.
- Pioneered testing framework for customer communications. Maintaining email, call, letter, and reporting scripts and ETLs, impacting thousands of customers daily.
- Helped standardize and uphold data and model validation standards, while productionizing model code.
- Server admin for modeling on AWS.

Developer – Columbia University

May-Aug 2014

- Led the development of an educational Django web application to facilitate Peer Instruction.
- The app was used in a physics course offered at Columbia during Fall 2014.
